ENGINEERING DESIGN & SUPPORT STAFF LOGNOTE

8 DECEMBER 1980

55. [redacted] 25X1

This morning I received a call from the warehouse advising us that they had checked a couple of the boxes that contains the [redacted] 25X1
equipment and had found that some of the inner containers had [redacted] 25X1
name marked on them. They asked if it was okay to ship as is or if all the
containers (apx. 40 crates) had to be opened, checked, and sanitized. I
checked with [redacted] 25X1
The decision was made that the
warehouse would have to open the complete shipment and sanitize all boxes
where necessary. We (FBIS) will probably be charged for the overtime at the
warehouse to get the job done but it seems like we have no other alternative. [redacted] 25X1
